

TEMITAYO KAYODE

Python Backend & ML Engineer

Remote · Open to Relocation | Osun, Nigeria | Temitayokayode5@gmail.com | +2347035401659

github.com/TemiKayode | [TemiKayode Portfolio](#) | LinkedIn

PROFESSIONAL PROFILE

Python Backend & ML Engineer with 5+ years building production-grade systems at the intersection of machine learning, security engineering, and distributed data pipelines. Shipped intelligence-grade biometric authentication (Kafka + ArcFace + Qdrant), OSS supply chain attack detection, real-time AST code intelligence, and ML football scouting platforms covering 20,000+ players across 36 leagues. Background in mechanical engineering provides a systems-first, failure-mode-aware approach to software architecture. Available for remote roles worldwide and open to relocation.

CORE SKILLS

Languages: Python · JavaScript / TypeScript · Go · Rust · SQL

Backend & Streaming: Kafka · FastAPI · Node.js · Express · REST APIs · Avro / Schema Registry

ML & Data: ArcFace / InsightFace · Qdrant (vector DB) · Pandas · NumPy · Streamlit · scikit-learn

Security Engineering: Biometric auth pipelines · HMAC audit trails · Supply chain analysis · GDPR · IAM

DevOps & Cloud: Docker · Kubernetes · KEDA · GitHub Actions · GitLab CI/CD · AWS · Azure · GCP

Databases: PostgreSQL · MongoDB · Redis · Firebase · Supabase

Frontend: React · Next.js · Tailwind CSS · TypeScript

Observability: OpenTelemetry · Sentry · Distributed tracing

PROFESSIONAL EXPERIENCE

Full Stack Developer & Founder

Orda Enterprise | Sep 2025 – Present

- Founded and architected OrdaDelivery — a multi-role food delivery platform connecting restaurants, drivers, and customers with real-time order tracking.
- Built the complete technical stack: React/TypeScript frontend, Node.js backend, Socket.io real-time layer, MongoDB data model, Stripe payments, and Docker deployment.
- Designed multi-role access system for seller, driver, and customer interfaces with live delivery status and inventory management.

Python Backend & ML Engineer

Freelance — Client & Open Source Projects | 2022 – Present

- FaceSentinel: Built Kafka-native biometric authentication pipeline using ArcFace/InsightFace and Qdrant vector search — three security tiers, HMAC-SHA256 audit trail, GDPR right-to-be-forgotten, anomaly detection, and OTel spans. Decisions delivered in <350 ms.
- Harbinger: OSS supply chain attack detection monitoring maintainer trust signals across GitHub, npm, and PyPI — catches compromised accounts before malicious releases ship.
- Live System Intelligence Graph: Real-time AST-to-execution trace mapper generating signed Change Impact Certificates in <60 s on every PR.
- Global Football Scouting Platform: ML analytics covering 36 leagues and 20,000+ players with FBref-style per-90 stats and ML-ranked transfer targets.

- SchoolIMS: Full-stack school management platform with four role dashboards (Admin, Teacher, Student, Parent), Redis caching, Kubernetes orchestration, and Sentry observability.

Product Owner / Full Stack Developer

Woods Air Movement, UK | Nov 2024 – Jun 2025

- Led ideation and deployment of a custom HVAC helpdesk platform using Power Automate and Excel integration; achieved sub-1-minute response time for field engineers.
- Defined and prioritised product backlog; aligned sprint planning with stakeholder needs across engineering and operations teams.
- Improved on-time delivery rate to 95% and customer satisfaction scores by 20%.

Full Stack Developer

Hoope, Nigeria | Jun 2024 – Nov 2024

- Developed cross-platform features for health and education applications using React, Node.js, and MongoDB.
- Built mobile-responsive interfaces with optimised load performance and third-party API integrations, reducing server latency by 40%.

Security Engineer (Contract)

Remote | Jun 2022 – Nov 2023

- Enforced GDPR compliance across client platforms in collaboration with engineering teams.
- Reduced vulnerability exposure and compliance risk using data-driven monitoring systems.

Mechanical Engineer / Junior Developer

Loladeji & Sons, Nigeria | Nov 2020 – May 2022

- Built automation solutions that reduced operational costs by £50,000+ and improved delivery timelines by 20%.
- Developed Python scripts for performance tracking and process refinement — first hands-on software engineering work.

KEY PROJECTS

FaceSentinel — github.com/TemiKayode/FaceSentinel

Kafka · Python · ArcFace · Qdrant · Docker · Kubernetes · OpenTelemetry · GDPR

Global Football Scouting Analytics Platform —

github.com/TemiKayode/Global-Football-Scouting-Analytics-Platform

Python · Streamlit · ML · Pandas · FBref · 36 leagues · 20,000+ players

Harbinger — OSS Supply Chain Intelligence — github.com/TemiKayode/harbinger

Python · GitHub API · npm · PyPI · Security Engineering

Live System Intelligence Graph — github.com/TemiKayode/live-system-intelligence-graph

Python · AST · OpenTelemetry · CI/CD · Signed Change Impact Certificates

SchoolIMS — School Management System — github.com/TemiKayode/School-Management-System

Next.js · Node.js · PostgreSQL · Redis · Docker · Kubernetes · Sentry

OrdaDelivery — Food Delivery Platform — github.com/TemiKayode/Orda

TypeScript · React · Node.js · MongoDB · Socket.io · Stripe

EDUCATION & CERTIFICATIONS

- B.Tech in Mechanical Engineering — LAUTECH, 2013–2020
- Google Cybersecurity Certificate — Google, 2023
- Certified Scrum Product Owner (CSPO) — Scrum Alliance, 2023
- SQL Advanced — HackerRank, 2022
